

Job Title: Research Intern

About Us

Accubits Invent is a translational research and product development company focussing on Medical Devices. Our focus is on interdisciplinary research in Biotechnology and Material sciences for the development of novel sensor technology to be used in Agriculture and Healthcare. Established in 2020, our mission is to understand nature for the betterment of humanity.

Role Description

We are seeking a dynamic Research Intern to join our team! As a Research Intern at Accubits Invent, you will be involved in day-to-day research activities, particularly in the realm of Sensor fabrication and development. This role offers an opportunity to work closely with our experienced researchers and learn from their expertise.

Requirements

- Strong research and analytical skills
- Knowledge of Basic Sciences and Mathematics
- Ability to work independently and collaboratively
- Attention to detail and ability to follow protocols
- Enthusiasm for learning and exploring new areas of research
- Aptitude for research or lab work is advantageous
- Freshers with or completing a degree in relevant fields such as Biotechnology, Electronics, Chemistry, Physics, Material Sciences, or related disciplines are encouraged to apply.

Preference

This is an on-site internship role located at our campus in Bio360 Life Sciences Park, Thonnakkal, Thiruvananthapuram, Kerala. Preference will be given to freshers residing within a commutable distance of 5-10 km from our [facility](#).
